### **To Whom It May Concern:**

SQT Technologies (M) Sdn Bhd is a vendor of Telekom Malaysia Berhad and registered with Ministry of Finance for supply of power backup systems and IT related products.

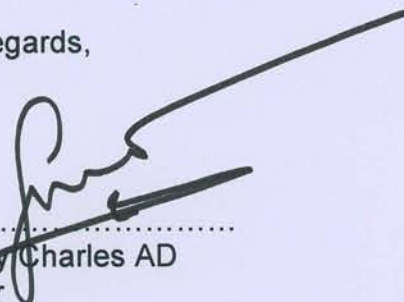

Taking up the Sulfarid challenge, I've purchased a junked battery from a workshop in Old Klang Road and allowed Sulfarid to revive the battery.

The said battery was installed into my car on the 20<sup>th</sup> Feb 2004, and had successfully been cranking my car up till the 6<sup>th</sup> of July 2005.

Sulfarid had returned an additional 16 months of life to the battery.

We at SQT Technologies offer Sulfarid Technologies this testimonial as a token of appreciation for their efforts in not only giving the people the most out of their batteries, but also their role in minimizing premature battery disposal.

Best Regards,

.....
